

yin.scot Animation Challenge

Young
Islanders
Network

Help to animate the yin.scot website.

Develop animation skills using FlipaClip software.

Use the Young Islanders Network compass logo as a starting point.

Help to make this website your space.

What direction will you take?

The animation challenge is to animate the compass.

What will you transform the compass into?

The animations will help bring the yin.scot website to life and explore the many different directions it will go.

Flipaclip is a fantastic piece of software for mobile devices which allows users to create animated movies and GIFs.

FlipaClip is a frame-by-frame 2D animation app used by millions of people around the world! It's like a flipbook!

Many animators use flipaclip from the pre-production stage all the way to complete high-quality short stories.

A free version of Flipaclip is available to download for IOS and android at the App store or Google Play.

Save the compass to your phone or tablet and watch our how to video at yin.scot/animation-challenge/

Once you have made it, submit your animation using the upload link below.
